Declaration of RoHS and PFOS Directive Conformity

This document is to certify that the whole of the supplies/services detailed have been inspected and conformed with the requirements of RoHS Directive 2002/95/EC and PFOS Directive 2006/122/EC.

Content of Declaration

Maximum concentration values of hazardous substances permitted.

- (a) a maximum concentration value of 0.1% by weight in homogenous material for lead.
- (b) a maximum concentration value of 0.1% by weight in homogenous material for hexavalent chromium
- (c) a maximum concentration value of 0.1% by weight in homogenous material for mercury
- (d) a maximum concentration value of 0.1% by weight in homogenous material for polybrominated biphenyls
- (e) a maximum concentration value of 0.1% by weight in homogenous material for polybrominated diphenyl ethers
- (f) a maximum concentration value of 0.1% by weight in homogenous material for Deca-BDE
- (g) a maximum concentration value of 0.01% by weight in homogenous material for cadmium
- (h) a maximum concentration value of 0.01% by weight in homogenous material for Perfluorooctane sulfonates

The following products series comply with the Directive as above mention.

Product Series :

Please refer to the attached list for details.
